This work must be done in collaboration with our youth, families, leaders, teachers, specialists, and community. It is imperative that this work be done with a system focused and aligned approach that utilizes Implementation Science and fits within a district's and school's Multi Tiered System of Supports.

This workshop is for Neighborhood and Charter students, school staff, school leaders, district leaders, families, and community partners.

To bring understanding and awareness to all stakeholders that educating our youth requires aligned and connected work in academics, mental health, health and wellness, behavior, and family school community partnering.

Sessions will run throughout the day on April 19th PD Day on the above topics.
